CONTAINED VENTED ENCLOSURE (CVE) ETA363024ABD TECHNICAL SPECIFICATIONS

CONTAINED VENTED BALANCE ENCLOSURE -ETA363024ABD

GENERAL DESCRIPTION	DESIGNATED USAGE										
	FSI contained vented enclosures provide personnel and environmental protection bu										
	no product protection. These Class I BSCs are commonly used to enclose specific										
	equipment or procedures that potentially generate aerosols. BSCs of this class are either ducted or un-ducted. PRIMARY ENGINEERING CONTROL (PEC) TYPE Class I Contained Vented Enclosure. MAIN CHAMBER CLASSIFICATION Suitable for OEB Levels 1-3										
						MODEL SPECIFICATIONS	CONFIGURATION				
							Setup includes Bag In/Bag Out Dual HEPA Filters, Blanked Plates on both sides for				
							optional disposal port, and 1.5" iris ports on both sides for cord management.				
							Exterior Dimensions				
Length:	35.75"	Length:	31.79"								
Depth:	30.00"	Depth:	26.55"								
Height:	51.56"	Height:	24.25"								

MATERIALS OF CONSTRUCTION	Enclosure panels:	Clear 0.375" acrylic front and side panels. White 0.375" acrylic rear panel		
	Work surface:	Black 1" base that is dished to 0.5" (Phenolic Resin Base), Routed to Fit Sidewalls for Containment		
	Plenums/Baffle:	White 0.375" acrylic rear plenum. Clear 0.375" upper panel.		
TECHNICAL SPECIFICATIONS	 <u>LAMINAR AIR FLOW FILTRATION</u> Fan & filter modules are mounted on the top panel of the unit Fan & filter modules provide HEPA (99.995% at mpps) vertically laminar filtered air Air velocity: Recommended 75 ft/minute average +/-5 when measured at face opening 			
	FAN CONSTRUCTION • High spee and high e • Fan shrou • Impeller I • Overall ou magnitud	ed balanced galvanized steel fan impeller wheel for low vibration energy efficiency. Id fabricated from fiberglass. Diameter = 9.8" utput of 50-55 dB @ 3 feet. Entire unit affords two orders of e isolation from adjacent equipment vibration and four orders of e isolation from fan vibration. d control unit included to properly set flow rate.		
	ELECTRICAL REQUIREMENTS • FAN: 120VAC, 50/60Hz, 1PH, 2.25AMPS, 270 WATTS at maximum flow, 5A FUSED • LED Light: 575ma 12 Volts DC (If purchased separately) • Hospital grade power cord supplied			
	CONTROLS • Light switch on/off button (when applicable) • Fan filter switch on/off • Integrated Alarm with Lighted Switch and Audible alarm • Hospital grade power cord			
	WASTE & PORTOTwo 1.5" knock outs, one on either side of the enclosure to the rear.OBlank waste chute port for (optional) Disposal Port			
	 <u>VELOCITY ALARM</u> 0.2 Amps with dry contact feature provided Integrated into top mount fan housing and equipped with red light which warns of low velocity; green light which indicates nominal containment velocity with proper certification 			
	velocity 7 o With Thin Maintain	TIONS g range 60-100 LFPM (0.30-0.50 m/s). Factory recommended face 5 LFPM +/- 5 LFPM (0.38 m/s) nble, (258) Total CFM Required at House Exhaust Connections to 100 LFPM at the face opening. For recirculating into room, (224) I required to maintain 100 LFPM at Face opening.		

	EXHAUST RECOMMENDATIONS		
	 Use thimble connection (FS2081MS) for House Exhaust connections. No additional equipment required for independent recirculating configuration 		
DESIGN FEATURES	The Contained Vented Enclosure is designed with multiple features for maximum containment, ease of use, and ensuring a stable work environment for sensitive activities:		
	 <u>EXHAUST PORT</u> (1x) 6" exhaust port Capable of being recirculated back into the lab Thimble connection required to connect to house exhaust 		
	 <u>FS1650 ALARM</u> SS1650 Integrated Face Velocity Alarm Alerts the operator when airflow is compromised. 		
Part #: ALL363024NW	 OPTIONAL ADDER LED LIGHT KIT Natural cool white light. Comes with a three-way toggle switch that is off/high/low. Amber option available 		
	 <u>FRONT LIFT DOORS</u> O Hinged front doors that lift for easy loading and unloading of equipment 		
	 <u>AIRFOILS</u> Quantity: Four (4) (2 side airfoils, 1 base airfoil, 1 door airfoil) Airfoils staged around the perimeter of the face opening stabilize the airflow, improve laminar airflow, and improve containment along the leading edge. 		
	DISHED BASE O Dished phenolic base captures accidental liquid and powder spills.		
	WASTE PORT O Waste port can be placed on either and/or both sides of the enclosure and is used to safely remove waste.		
	PLENUMS • Rear and Top Plenums are used to direct airflow and maintain containment at the face opening. • Plenums also prevent particles from possibly falling back onto the work surface during loss of power and primary HEPA filter changeout.		
	 <u>BAG IN/ BAG OUT</u> HEPA change out system that allows for safe removal and replacement of the main 4" HEPA filter. 		

Part #: 4165	REPLACEMENT FILTER		
	 Replacement Primary HEPA Filter Kit. 		
Part #: 4135	REPLACEMENT FILTER		
	Replacement HEPA Filter.		
Part #: 4740A-18X30	REPLACEMENT FAN		
	Top mount fan filter housing with integrated alarm.		
PART #: 4740-18X30	REPLACEMENT FAN		
	 Top mount fan filter housing. 		
Part #: 2070	WASTE CHUTE (PORT)		
	 Waste chute with retaining band and bag. 		
Part #: 2079	Double Safe Waste Chute		
	• Waste chute with double sleeve protection, retaining band and bag.		
Part #: 2081MS	THIMBLE CONNECTION, 6" TO 7" TRANSITION		
	 Thimble for connection to house exhaust. 		
Part #: 2062VK	VENT KIT, (8') 6" HOSE AND (2) HOSE CLAMP		
	 Hose and Clamp for connection to house exhaust. 		
Part #: S1242	8" Continuous Liner System		
	 Integrated Continuous Liner System for safe waste disposal. Seal at any increment for disposal of waste in any amount. 		
Part #: 2077	PRINTER SHELF – NO ALARM MOUNT		
	 Label printer shelf for above blank plate for label printing. 		
PART #: AFC183608A_(A/B)	CARBON FILTER 18x36- ORGANIC		
	 Powder coated carbon steel frame containing 10 ABS plastic canisters with coconut shell activated charcoal media. 		
PART #: AFC183608B_(A/B)	CARBON FILTER 18x36 - ACID		
	 Powder coated carbon steel frame containing 10 ABS plastic canisters with impregnated coconut shell activated charcoal media. 		
PART #: AFC183608C_(A/B)	CARBON FILTER 18x36-AMINE		
	 Powder coated carbon steel frame containing 10 ABS plastic canisters with impregnated coconut shell activated charcoal media. 		
Part #: AFC183608D_(A/B)	CARBON FILTER 18x36 - ALDEHYDE		
	 Powder coated carbon steel frame containing 10 ABS plastic canisters with impregnated coconut shell activated charcoal media. 		
PART #: AEC3630S	ADA, 36 x30, ELECTRIC POWDER COATED TABLE		
	 Electric Ergonomic Lift Table, Powder coated carbon steel, on frame and feet, locking casters. 		

PART #: AES3630S	ADA, 36 x 30, Stainless Steel Ergonomic Lift Table		
	 Electric Ergonomic Lift Table, 304 Stainless Steel, on frame and feet, locking casters. 		
PART #: ACC3630S	ADA, 36 x 30, Powder Coated Steel Cart		
	• Powder coated carbon steel cart, on frame and feet, locking casters.		
PART #: ACS3630S	ADA, 36 x 30, Stainless Steel Cart		
	 304 Stainless steel cart, on frame and feet, locking casters. 		
PART #: ATC3630S	POWDER COATED STEEL, 36 x 30 TABLE		
	• Powder coated steel table.		
PART #: ATS3630S	STAINLESS STEEL, 36 x30, TABLE		
	 304 Stainless steel table, on frame and feet, locking casters. 		
INSTALLATION, START-UP AND	INSTALLATION (at an additional charge)		
TRAINING	Flow Sciences will send One (1) Technician onsite to install equipment within your		
	facility. Flow Sciences may require additional assistance on site. If additional		
	assistance is required, Flow Sciences will request your assistance or provide additional technicians from Flow Sciences (at an additional charge) if no client staff is available.		
	Start-UP and Training (at an additional charge)		
	One (1) Flow Sciences technician will demonstrate the usage of the equipment and		
	train your personnel on the usage of the equipment after the installation is complete.		
	Flow Sciences will provide an operating manual which will include the as built		
	drawings and all the materials certificates.		
	***Please note that proposal amount for Installation, Start-up and Training is for 1		
	days of work for one technician. Should the labour exceed this time frame, and		
	hourly labour rate will apply.		
	SURROGATE POWDER TESTS (at an additional charge)		
	Surrogate powder testing available during factory acceptance testing.		
	IQOQ – INSTALLATION OPERATION QUALIFICATION (at an additional charge)
